

# Alec Youngblut

Full Stack Developer

## Professional Summary

Enthusiastic software developer who is eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Highly motivated to learn, grow and excel with my skills as a full stack developer, both independently and collaboratively.

## Work History

2023-06 -

### Software Engineer

Andersen Corporation, Strathroy, Ontario

- Designed and delivered end-to-end bespoke software solutions for all production areas replacing paper workflows and automating data capture to improve traceability and operational accuracy.
- Built and maintained management reporting tools, ETL pipelines, and integrations that consolidated production, inventory, and shipping data, ensuring compliance with corporate standards while preserving site-specific process flexibility

2021-02 -  
2023-02

### Software Developer

Clarendon Technologies, London, Ontario

- Worked both independently and collaboratively to design, build and maintain web-based software solutions tailored to clients needs
- Developed code for internal and external use across several different sectors such as industrial agriculture, professional development, as well as transportation and hospitality
